MANAGEMENT
3.0 **Agile Leadership Practices**

The Product Owner should not attend Sprint Retrospectives

**The Product Owner should not
attend Sprint Retrospectives**

Problem: PO does not improve over time

**The best PO is always the
customer**

~~The best PO is always the customer~~

➔ Problem: Availability

~~The best PO is always the customer~~

→ Problem: Availability
Problem: Pressure

**The best PO is always the
customer**

Problem: Availability

→ Problem: Pressure

Problem: I don't know what I want

**The best PO is always the
customer**

Problem: Availability

Problem: Pressure

→ Problem: I don't know what I want

Problem: Retrospectives

Scrum is simple, but it's not easy!

Scrum is simple, but it's not easy!

Problem: Culture

**ScrumMaster should focus on
local impediments**

**ScrumMaster should focus on
local impediments**

Truth: He's a change agent

**It's not much of a problem to be
ScrumMaster and Developer at the
same time**

**It's not much of a problem to be
ScrumMaster and Developer at the
same time**

 **Problem: You should be neutral**

**It's not much of a problem to be
ScrumMaster and Developer at the
same time**

- ➔ **Problem: You should be neutral**
- Problem: You can't observe while you're coding**

**You don't need technical
background to be a ScrumMaster**

You don't need technical background to be a ScrumMaster

➔ Truth: He's a facilitator, not a tech lead

The Product Owner should not attend Sprint Retrospectives

The best PO is always the customer

Scrum is simple, but it's not easy!

ScrumMaster should focus on local impediments

It's not much of a problem to be ScrumMaster and Developer at the same time

You don't need technical background to be a ScrumMaster

Thanks :-)
